Introduction to Responsible AI

Muhammad Talha Waseem

Senior Full Stack Engineer | React, Node, Next.js, Flutter | AI-First
Engineer | Generative AI | Langchain | AI Agents & LLMs Integration
in Healthcare & Fintech | Growth Focused Tech Geek
Islāmābād, Pakistan

Summary

As someone deeply passionate about tech, I started my journey with curiosity around Windows tricks, games, and cybersecurity. That early spark led me to explore ethical hacking and Python in my early days. Eventually, I found my way into web development, building static websites and gradually moving into full-stack applications.

Since then, I've grown into a full-time software engineer, working across multiple stacks, including Laravel, React/Next.js, and SwiftUI. I currently lead frontend development in Flutter. I haven't left the previous stacks behind; I believe in parallel learning and practical application across platforms.

I'm a driven and skilled front-end developer with over 5+ years of experience creating high-performance, responsive user interfaces. Known for my focus on delivering superior UX. I have a proven track record of transforming complex interface concepts into visually compelling and user-friendly apps.

Throughout my career, I have successfully translated requirements into user-centric designs and UI components that enhance usability and efficiency. My expertise includes conducting thorough code reviews, establishing coding guidelines, and contributing innovative solutions to improve developer workflows, project maintainability, and scalability.

With a robust skill set across JavaScript, Flutter, SwiftUI, and web frameworks like React and Next.js. My experience spans building responsive interfaces, component-based architectures, and cross-platform applications. I also work with REST APIs, GraphQL, and Node.js, aligning with modern development standards.

Lately, my focus has grown to include AI workflows and automation — exploring tools like LangChain, AI Agents, and n8n, where I blend my frontend expertise with modern LLM-powered apps and intelligent system design.

I thrive in multidisciplinary team environments, working seamlessly with designers and backend devs to build reusable UI components and optimize performance. My strong debugging skills, attention to detail, and commitment to quality ensure that each project meets both user needs and business objectives.

Beyond tech, I'm always trying to balance life — learning more about religion, personal finance, and emotional resilience. I enjoy reading and diving deep into subjects like astronomy and spirituality. And like most devs, I've got my version of the perfect cup of chai ##.

Always open to learning, building, and connecting.

Experience

Rayymen Technologies Private Limited

Senior Frontend Developer

June 2025 - Present (1 year 2 months)

Lahore

- Built responsive and reusable user interfaces using Next.js for the web, SwiftUI for iOS, and Flutter for cross-platform mobile apps.
- Led the frontend and mobile efforts on key products, including complex SwiftUI apps using Combine, animations, and dynamic views, and Flutter apps following clean architecture and modular design.
- Defined and enforced coding standards, reusable component libraries, and architectural patterns to ensure clean, scalable, and testable codebases.
- Developed Work Breakdown Structures (WBS) and sprint plans to break down features, estimate timelines, and manage task execution efficiently.
- Collaborated closely with backend teams, product managers, and designers to align technical implementations with user needs and business goals.

- Conducted in-depth code reviews and offered mentoring to junior developers, encouraging a culture of quality and shared learning.
- Integrated modern tooling and frameworks (e.g., Flutter DevTools, React DevTools, Lighthouse, Instruments) to enhance performance and debugging.
- Continuously optimized performance across platforms by profiling rendering bottlenecks and implementing best practices for smooth UX.
- Explored and implemented cutting-edge features such as PWAs, AI-assisted user flows, and AR experiences in mobile apps.
- Maintained technical documentation covering architecture, workflows, and development practices to support onboarding and future scalability.
- Actively participated in retrospectives and sprint meetings, identifying process improvements and driving a culture of iteration and innovation.

Hyperleap Future Technologies

Senior Frontend Developer

July 2024 - July 2025 (1 year 1 month)

Lahore, Punjab, Pakistan

- Architected and implemented highly responsive and reusable user interfaces using Next.js, and SwiftUI.
- Led the development of advanced SwiftUI applications, leveraging Combine, animations, and dynamic views.
- Established and enforced coding standards and guidelines to ensure code consistency, maintainability, and testability across teams.
- Created Work Breakdown Structures (WBS) for efficient project planning, task estimations, and sprint management.
- Collaborated with cross-functional teams, including backend developers, designers, and product managers, to deliver seamless and scalable solutions.
- Conducted in-depth code reviews, providing mentorship and promoting best practices for frontend and mobile development.
- Spearheaded the integration of modern tools and technologies to enhance the developer experience and project efficiency.
- Optimized the performance of web and mobile applications using profiling tools like Lighthouse, React DevTools, and Instruments.
- Explored and implemented emerging technologies such as PWAs, AI-driven UX, and AR features in mobile apps.
- Documented architectural decisions, coding standards, and development processes for improved team collaboration and knowledge sharing.
- Actively participated in sprint retrospectives, contributing insights to identify process improvements and promote a culture of continuous learning and innovation.

i-ways sales solutions GmbH
Senior Frontend Developer
June 2022 - July 2024 (2 years 2 months)
Berlin, Germany

- Architected and implemented highly responsive and reusable user interfaces using Next.js, and SwiftUI.
- Led the development of advanced SwiftUI applications, leveraging Combine, animations, and dynamic views.
- Established and enforced coding standards and guidelines to ensure code consistency, maintainability, and testability across teams.
- Created Work Breakdown Structures (WBS) for efficient project planning, task estimations, and sprint management.
- Collaborated with cross-functional teams, including backend developers, designers, and product managers, to deliver seamless and scalable solutions.
- Conducted in-depth code reviews, providing mentorship and promoting best practices for frontend and mobile development.
- Spearheaded the integration of modern tools and technologies to enhance the developer experience and project efficiency.
- Optimized the performance of web and mobile applications using profiling tools like Lighthouse, React DevTools, and Instruments.
- Explored and implemented emerging technologies such as PWAs, AI-driven UX, and AR features in mobile apps.
- Documented architectural decisions, coding standards, and development processes for improved team collaboration and knowledge sharing.
- Actively participated in sprint retrospectives, contributing insights to identify process improvements and promote a culture of continuous learning and innovation.

Tejarat Hub (Private) Limited
Laravel Developer
December 2020 - May 2022 (1 year 6 months)
Islāmābād, Pakistan

- Leading the development and deployment of highly responsive web applications using Laravel's robust framework.
- Collaborating proactively with the development team to brainstorm and implement innovative web application features and functionalities.
- Carefully evaluating application requirements and interface designs, and architecting web-based user interactions to enhance user experiences.
- Actively engaging in code reviews to maintain a high standard of code quality, reliability, and security in the Laravel-based projects.

- Initiating and implementing innovative solutions to enhance developer experience and ensure long-term maintainability and scalability of projects.
- Establishing and enforcing coding guidelines that promote code consistency, testability, and ease of comprehension for seamless collaboration.
- Staying informed about the latest Laravel advancements and industry best practices, applying them judiciously to projects for optimal results.

Fiverr

Web Developer

March 2020 - December 2020 (10 months)

Islamabad, Pakistan

RogenTech

Full Stack Developer

June 2018 - March 2020 (1 year 10 months)

Islamabad, Pakistan

- Responsible for managing the development of both the frontend and backend of a web application.
- Designing and implementing user interfaces using technologies such as HTML, CSS, and JavaScript.
- Developing and maintaining the application's server-side logic using Laravel and LAMP Stack.
- Working in a team environment, collaborating with other developers, designers, and project managers to deliver high-quality software on time.
- Also, working with GIT VCS to effectively manage code changes
- Working with databases, such as MySQL, MongoDB, maintain and optimize them for performance.
- Deploy the application on different hosting environments.

Education

COMSATS University

Bachelor's degree, Computer Software Engineering · (February 2018 - January 2022)

F.G Quaid-e-Azam College

ICS with Physics, Computer Science · (2015 - 2017)

IMCB Humak Islamabad

Matric, Science · (2013 - 2015)
