Islamabad, Pakistan • +92-348-558-3125 • [muhammadtalhawaseem@gmail.com](mailto:muhammadtalhawaseem@gmail.com) • [linkedin.com/in/iammtw](https://www.linkedin.com/in/iammtw)

## PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with **5+ years of experience** delivering scalable, high-performance applications across web and mobile. Expert in **React, Next.js, Node.js, and Flutter** with hands-on AI/LLM integration. Led full-stack teams, established engineering standards, and shipped complex products in Fintech and Healthcare. Passionate about user-centric design, clean architecture, and building technology at scale.

## TECHNICAL SKILLS

|                  |                                                                         |
|------------------|-------------------------------------------------------------------------|
| Languages        | JavaScript (ES6+), TypeScript, Dart, Swift, Python, PHP, HTML5, CSS3    |
| Frameworks       | React.js, Next.js, Flutter, SwiftUI, Node.js, Laravel, LangChain, n8n   |
| Mobile           | Flutter (Clean Architecture, GetX, BLoC), SwiftUI (Combine, Animations) |
| AI & Automation  | LangChain, AI Agents, LLM Integration, n8n Workflows, OpenAI API        |
| APIs & Backend   | REST APIs, GraphQL, Firebase, Node.js, MySQL, MongoDB, LAMP Stack       |
| DevOps & Tooling | Git, CI/CD, AWS, Docker, Lighthouse, React DevTools, Flutter DevTools   |
| Methodologies    | Agile/Scrum, WBS Planning, Code Review, TDD, Clean Architecture, PWA    |

## PROFESSIONAL EXPERIENCE

### Rayymen Technologies Private Limited

June 2025 – Present

Senior Full-Stack Developer

Lahore, Pakistan

- Built responsive, reusable UIs in **Next.js and Flutter** alongside scalable **Node.js/Express** REST APIs; led a full-stack team of 5+ engineers on high-impact products following clean architecture and modular design.
- Designed and maintained backend services including **authentication, role-based access control, and RESTful API** endpoints consumed by web and mobile clients, reducing API response times by **30%**.
- Defined team-wide coding standards, reusable component libraries, and architectural patterns — improving maintainability and reducing onboarding time by **40%**.
- Developed WBS and sprint plans; drove predictable delivery cycles and reduced feature estimation variance across engineering teams.
- Mentored **3+ junior developers** through in-depth code reviews on both frontend and backend codebases; fostered a culture of quality and shared best practices.
- Implemented **PWAs, AI-assisted user flows, and AR experiences**; profiled and optimized performance with Flutter DevTools and server-side monitoring tools.

### i-ways Sales Solutions GmbH

June 2022 – July 2025

Senior Full-Stack Developer (Remote)

Berlin, Germany

- Led frontend and mobile development for a German SaaS company; delivered **10+ production-grade** Next.js web apps and SwiftUI iOS app across European markets.
- Collaborated with international cross-functional teams across **3+ time zones** to translate business requirements into scalable, user-centric frontend solutions.
- Pioneered PWA adoption and AI-driven UX implementations, reducing technical debt by **35%** and improving long-term project scalability.

### RogenTech

June 2018 – March 2020

Full Stack Developer

Islamabad, Pakistan

- Developed **5+ full-stack** web applications with HTML, CSS, JavaScript, Laravel, and MySQL/MongoDB; collaborated in Agile teams and managed deployments across multiple hosting environments.

## PROJECTS

### Receivify

[app.receivify.co](https://app.receivify.co)

Next.js, PostgreSQL, Server Actions, React, TypeScript, Tailwind CSS, AWS ECS, S3 and Bedrock

- Built **interactive** dashboards, advanced data tables, filtering, search, and watchlist functionality for legal and financial professionals managing receivership cases.
- Implemented case status tracking, recurring task management, and portfolio-level reporting, reducing manual case monitoring effort by **50%**.
- Integrated **AI-powered case narrative generation** using AWS Bedrock, cutting narrative drafting time by **70%**; collaborated with cross-functional teams in an agile environment to deliver production-ready features.

## Mares Media

[maresmedia.se](https://maresmedia.se) | [Android](#) | [iOS](#)

*Next.js, Flutter (Clean Architecture), REST APIs, State Management, Tailwind CSS*

- Led end-to-end Flutter development across Android, iOS, and Web, shipping to **2 app stores**; delivered pixel-perfect UI, smooth animations, and real-time dynamic content rendering.
- Implemented clean architecture and modular code structure; integrated REST APIs with efficient state management, improving content load performance.
- Ensured code quality through reusable components, best practices, and proper error handling; collaborated with backend, product, and design teams throughout.

## WeAid — Non-Profit Fundraising & Fiscal Hosting Platform

[we-aid.org](https://we-aid.org)

*Next.js, React, TypeScript, REST APIs*

- Built **15+ reusable** UI components and integrated REST APIs for donation, initiative, and campaign management across a legally compliant pan-European nonprofit platform.
- Improved UX, application performance, and cross-browser compatibility, achieving a **30%** reduction in page load time; collaborated with designers and backend engineers in an agile environment.

## GetKong — Digital Medical Cannabis Platform

[getkong.de](https://getkong.de)

*Next.js, React, TypeScript, Stripe, Adyen, REST APIs*

- Built dynamic **multi-step medical questionnaires** with conditional logic, validation, and progress tracking — enabling patients to complete fully digital treatment journeys in Germany.
- Integrated **Stripe and Adyen** payment gateways, processing secure e-prescription payments; developed pharmacy onboarding workflows integrating **20+ partner pharmacies**.
- Integrated REST APIs covering **6+ domains** — patient registration, consultations, prescriptions, pharmacy operations, and payment processing — in close collaboration with backend and design teams.

## Distill — Logistics Simulation Tool

[map.distill-lausitz.de](https://map.distill-lausitz.de)

*React, Leaflet.js, Geospatial APIs*

- Integrated geospatial data and built interactive transportation maps using React Leaflet.js to support supply chain optimization and logistics simulation workflows.

## Emproc — Construction & Project Management Platform

[emproc.de](https://emproc.de)

*Next.js, Contentful CMS, Tailwind CSS*

- Built a robust CMS-driven platform for architects, engineers, and construction experts using Next.js and Contentful, delivering scalable cost management and project tracking features.

## Revalu — Sustainable Material Data Platform

[platform.revalu.io](https://platform.revalu.io)

*Next.js, React, TypeScript, Data Integration*

- Contributed to frontend development and EPD data integration for a sustainability-focused construction platform helping architects select low-carbon building materials.

## OTHER CONTRIBUTIONS

---

### eBay Live Auction, Donations & Cities

React, PHP [case study](#)

Live auction bidding, donation & engagement apps

### Patient Assistant — Flutter + AI

Flutter, AI/LLM Integration

AI-powered patient assistant with intelligent health flows

### Tvinn — Internal Web App

React, REST APIs [internal link](#)

Internal web tool; contributed to frontend development

### Xrouten — Android Navigation App

Flutter, Android [Play Store](#)

Navigation & routing app published on Google Play

### Harmony Playground — iOS App

SwiftUI, Combine

Interactive audio & music playground built in SwiftUI

## EDUCATION & CERTIFICATIONS

---

**B.S. Computer Software Engineering** — COMSATS University Islamabad

2018–2022

**Certifications:** DevOps on AWS (Amazon Web Services)
