PROFESSIONAL SUMMARY:

Frontend Developer with 4+ years of experience specializing in React, Next.js, and TypeScript, building responsive and high-performance web applications. Proven track record in developing CMS-integrated platforms, admin dashboards, and data-driven interfaces using modern state management and API integration. Adept at leading frontend projects and collaborating with cross-functional teams to deliver scalable, production-ready solutions.

TECHNICAL SKILLS:

Languages:	JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks & Libraries:	React.js, Next.js
State & Data Management:	Redux / Redux Toolkit, Zustand, TanStack Query / Table, React
UI & Visualization:	Tailwind CSS, shadcn/ui, Material UI, D3.js, Recharts
Tools & Deployment:	Git, GitHub, Vite, Webpack, Vercel, Netlify
Backend:	Node.js, Express.js, MongoDB

PROFESSIONAL EXPERIENCE:

Rayymen Technologies Private Limited || Lahore, PK

Mid Senior Frontend Developer || January 2026 - Present

- Built responsive, high-performance, pixel-perfect UIs using Next.js and React 19 across multiple company products, including content platforms, admin panels, and marketplace management systems.
- Integrated REST APIs for authentication, role-based access, and data-driven views, along with third-party services including Contentful CMS and eBay/Mirakl APIs.
- Contributed to WBS planning for frontend deliverables, supporting predictable delivery timelines across projects.
- Worked in an Agile environment, contributing to iterative development cycles and timely feature delivery.

BottomCode|| Lahore, PK

Frontend Developer || January 2025 - December 2025

- Translated requirements into functional features, coordinating with backend teams to align on data flow and API integration.
- Assisted junior developers with code reviews and technical troubleshooting across multiple projects.
- Collaborated with the team to ensure timely and accurate delivery of assigned features.

Silicon Nexus || Lahore, PK

Front End Developer || January 2022 - Nov 2024

- Participated in client calls to gather and clarify requirements, ensuring accurate translation into frontend implementation.
- Collaborated with UI/UX designers to review and refine Figma designs, ensuring alignment with client requirements before development.
- Built responsive frontend applications using React and Redux, integrating REST APIs and third-party services (Firebase, Stripe).

Projects:

Mares Website

maresmedia.se

Next.js 15, Contentful CMS, JW Player, TanStack Query, Zustand, Tailwind CSS, shadcn/ui

- Developed a fully responsive and pixel-perfect media platform featuring articles, podcasts, videos, and short-form video series.
- Fetched and rendered dynamic content from Contentful CMS with properly formatted rich text, optimizing performance using TanStack Query with persistent caching.
- Integrated JW Player for video/shorts playback, along with category browsing, search, and bookmarking features.
- Maintained a modular, reusable component structure with proper error handling, ensuring code quality and consistent performance; collaborated with design and product teams throughout development.

Receivify

app.receivify.co

Next.js, React, TypeScript, Tailwind CSS, Server Actions

- Built interactive dashboards, advanced data tables, filtering, search, and watchlist functionality for legal and financial professionals managing receivership cases. .
- Implemented case status tracking, recurring task management, and portfolio-level reporting UI, reducing manual case monitoring effort by 50%.

Fit Society

fitsociety.io

- Developed a responsive coaching app interface featuring a dynamic exercise library, nutrition plan builders, and real-time client-trainer messaging.
- Designed an intuitive dashboard with drag-and-drop workout builders, interactive nutrition calculators and client progress tracking reducing user onboarding time by 40%.
- Optimized frontend performance using lazy loading and efficient state management, improving page load speed across the app.
- Built dynamic forms with real-time validation for client assessment questionnaires, payment processing interfaces, and subscription management.

MSH

Next.js 15, Redux Toolkit, TanStack Query/Table, Azure AD (next-auth), Recharts, jsPDF, i18n

- Developed a multi-marketplace seller management platform integrating eBay and Mirakl APIs for bulk product listing and offer management.
- Built order, returns, and outlet management modules with data tables, filtering, and status tracking.
- Integrated Azure AD login integration and role-based route protection, along with multi-language (i18n) support.
- Developed dashboard analytics and statistics views using Recharts, including PDF/label generation with jsPDF.

Atlas App

Next.js, TypeScript, Tailwind CSS, TanStack Query, Jotai, Plotly.js, Auth0, PostHog, Usetour

- Developed a Next.js and TypeScript based application featuring interactive user tours (Usetour) to guide onboarding, along with Auth0 authentication.
- Integrated PostHog analytics with cohort tracking, and built a drag-and-drop dashboard with advanced search functionality.
- Developed dynamic data visualization dashboards using Plotly.js, with global state managed via TanStack Query and Jotai.

Rain

React, Material UI, TanStack Query, React Hook Form, D3.js

- Developed the frontend of a healthcare application enabling hospital staff across the US and Middle East to monitor OT and ward usage.
- Built complex dynamic forms with real-time validation using React Hook Form.
- Developed interactive D3.js data visualizations for real-time OT and ward statistics.

Essay Pro

React, Redux, Firebase, Stripe

- Developed a freelance platform with dedicated modules for clients, writers, and admins.
- Built order management functionality along with secure payments integration using Stripe.
- Implemented real-time notifications and chat, along with a review and ratings system for user feedback.

Streaming App Admin Panel

React, Redux, Material Ui

- Designed and developed a web-based admin panel to manage content and operations for a mobile streaming application.
- Built modules for managing novels, series, subscriptions, and coin packages, along with functionality for adding chapters and episodes.
- Developed a dashboard displaying key metrics and user activity insights for the mobile app.

Edjobster

React, Redux, API Integration

- Developed a job posting platform enabling companies to register, post job openings, and manage candidate applications.
- Built functionality for candidates to apply to jobs easily and track their applications.
- Implemented assessment creation and management tools for interviewers to conduct thorough applicant evaluations.
